**Declaration under Rule 4.17:**

- Of inventorship (Rule 4.17(iv)) for the following  
designation US.

**Published:**

- With the International Search Report.  
- Before expiry of the period provided for amending the  
claims, will be republished if such amendments are  
received.

For an explanation of the two-letter codes and the other  
abbreviations, reference is made to the explanations  
("Guidance Notes on Codes and Abbreviations") at the  
beginning of each regular edition of the PCT Gazette.

(I)

(57) Abstract: The invention concerns a method for preparing 1,3,5-triaminoben-  
zene, characterized in that it comprises a step which consists in amination of a compound of  
formula (I), wherein: A represents a halogen atom or a NH<sub>2</sub> group; X<sub>1</sub> and X<sub>2</sub>, identical or dif-  
ferent, represent each a halogen atom, the amination step being carried out in the presence of  
ammonia and a catalyst selected from the group consisting of copper salts, cupric and cuprous  
oxides or mixtures thereof at a temperature ranging between 150 °C and 250 °C and at a pres-  
sure higher than 35 bars.

(57) Abrégé : L'invention concerne un procédé de préparation de 1,3,5-triaminobenzène, caractérisé par le fait qu'il comprend  
une étape d'amination d'un composé de formule (I) dans lequel: A représente un atome d'halogène ou un group NH<sub>2</sub>. X<sub>1</sub> et X<sub>2</sub>,  
qui sont identiques ou différents, représentent chacun un atome d'halogène, ladite étape d'amination étant conduite en présence  
d'ammoniaque et d'un catalyseur choisi dans le groupe constitué par les sels de cuivre, les oxydes cuivrique et cuivreux ou leurs  
mélanges, à une température allant de 150 °C à 250 °C et à une pression supérieure à 35 bars.
